

Elina Parviainen

Elina Parviainen is an entrepreneur who has a long and versatile experience in work based ergonomics and project management in designing of industrial processes both in a global and national environment.

Her contribution in implementation of ergonomics in early phase of designing production lines was recognized in Finland 2004. She and the Department of Manufacturing Solutions at Nokia Mobile phone won the Ergonomics Award for executing ergonomics in a new and innovative way in the R&D organization.

After Nokia she studied work counselling and process consultation at the University of Turku graduating 2013. Since 2014 she has worked as entrepreneur offering services in designing ergonomics, work counselling and process consultation for developing organization structures, systems and ways of working having regard especially to ergonomics and safety factors.

She is active in associations such as Finnish Ergonomics association, Lean association and Work counsellors association – all these activities for enhancing the awareness and importance of human factors in work life in Finnish companies.
